

Ingredients:

Proprietary Blend of Methylated Soybean Oil, Fatty Acid Complex Alkoxylates, Alkyl Aryl Polyoxyethylene Glycol, Oligomeric Resin and Isomeric Alcohol Alkoxylate..... 90%

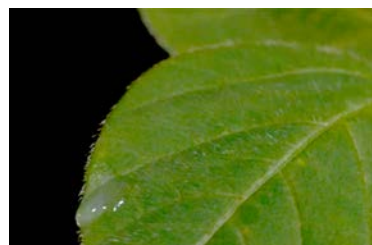

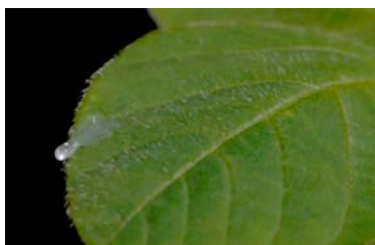

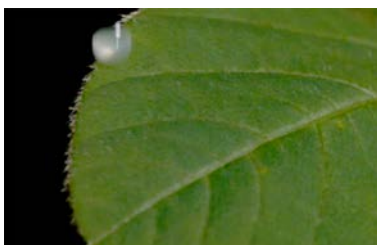

Cornbelt® GRIPTITE™ MSO is a high surfactant load methylated soybean oil containing a multifunctional patent pending nonionic surfactant and drift & deposition management agent with anti-bounce technology.

Cornbelt® GRIPTITE™ MSO is specially formulated to provide the MSO needed at reduced rates for herbicide technologies that require a high quality MSO for increased efficacy such as Kixor® technology.

Use **Cornbelt® GRIPTITE™ MSO** when the herbicide label calls for a MSO and you want better canopy penetration and droplet retention on the leaf surface.

Cornbelt® GRIPTITE™ MSO is designed for use with all nozzle types.

The adhesive properties of **Cornbelt® GRIPTITE™ MSO** provide superior anti-bounce of the spray droplet and greater retention on the leaf surface as demonstrated in the photos below.

Use Rate: 2 to 3 quart per 100 gallon of spray solution.

Always read and follow label instructions.
